3000 PSI

**Belt Speed:**  
0-9FT PER SECOND

**Total Weight on Trucks:**  
6,000 LBS

Thomas Concrete's Fleet of 17 all wheel drive mixers, mounted with a 52' telescope veyor and 10 all wheel drive 39' conveyors are the finest looking, highest maintenance fleet of krete conveyors in the country. They are operated by well trained, professional drivers and are strategically placed throughout our market.

Why hassle with having to make numerous phone calls? Why try to schedule a pump and coordinate concrete when you can simply make one phone call to Thomas Concrete. We can have your small to medium job (9cy—95cy) serviced by one of our krete veyors.

### **HERE IS WHAT HAPPENS.**

You schedule a pump for a 72 yard slab and you pump the entire job. When in reality you only needed three loads placed in an area you could not reach by conventional offloading, which ends up costing you money.

### **HERE IS WHAT SHOULD HAPPEN.**

Make "one" phone call and schedule your 72 yards placement. Ask for a 52' krete veyor for your hard to reach area. Our veyor will arrive on time with a load of concrete. Once the veyor unloads, our driver can remain on your job and offload additional mixers as needed, saving you time and money.

### **NO HIDDEN FEES — ONLY A FLAT PER YARD RATE.**

This eliminates estimating nightmares, hourly charges, travel time, yard charges and set up fees.

**CALL TODAY AND WE WILL BE GLAD TO HELP YOU!**
