

# THOMABLOC

Smooth, non-decorative concrete retaining wall blocks

## PRODUCT DESCRIPTION:

THOMABLOC are smooth, non-decorative concrete retaining wall blocks in a variety of sizes, with our most popular size being the full size (6' x 3' x 2'). Inquire about other sizes that may be available at different locations.

## APPLICATIONS:

Storage bins • Marine dock anchors • To create tiered/ layered yards in hilly areas • To prevent erosion in areas of instability • Security barriers • Tent tie downs (ballast) • Retaining walls • Erosion control • Traffic lane control

## BENEFITS:

THOMABLOC is a sustainable alternative for recycled concrete. Each block has a hook located on top for ease of movement. THOMABLOC works like large LEGOs for stacking and interlocking wall systems. Each THOMABLOC weighs approximately 5500 lbs.

## WHY IS RECYCLING IMPORTANT:

Thomas Concrete has a vision to reduce its long-term environmental impact in all local and global processes. We will continually strive to develop solutions for a sustainable society of tomorrow.
