

THOMA-SHOT

Concrete with improved performance for shotcrete.
THOMA-SHOT is a family of concrete products with improved performance for shotcrete and extruded concrete applications.

Discuss concrete with improved performance for shotcrete with your Thomas Concrete representative.

Applications:

- Pool shells
- Skate parks
- Soil stabilization
- Nail walls
- Curb
- Slip form paving
- Barrier walls
- Tunnel lining

FINISHING:

Normal finishing process for the application.

Benefits:

- Rebound reduction in shotcrete
- Less need for multiple layers due to increased build up in a single pass (up to 18 inches)
- Reduced pump line pressure
- Improved surface characteristics
- Less re-work to slip form concrete
- More cohesive mix to reduce segregation
